

Weston's SpeedShop

We have reached the peak in Japanese tuning and have gained the highest respect for cars that we have built for many companies. Now by popular demand we have gone back to our roots and introduced Weston's SpeedShop.

As the technology in vehicles increase the demand for our facilities spread throughout the high performance industry and our workshop soon filled with petrol heads in general.

Our technicians have helped and covered many full features in the leading magazines, and believe that the only difference between men and boys is the price of their toys.

So now you about us call 01217092300 or pop down and see us, there's always something mad we're working on.

V8 Specialists for street and strip, engine and transmission re-builds and replacements. Performance modifications inc turbos & superchargers, injection and carb conversions. Nitrous kits supplied, fitted and refilled. Diesel tuning and LPG conversions, ECU remapping, engine management systems.
